

Forklift 5,000 pounds

Model CPOD 25

Also called a lift truck, is a primarily industrial vehicle that uses a two-pronged forked front attachment to lift materials. Often, that material is on a wooden platform or pallet.

Unlike other machines that can be fitted with a forked attachment, such as a telehandler, the forklift is beneficial for projects that require a lot of material-moving.

Dimensions

a. Length to fork face	8.37 ft
b. Overall Width	3.78 ft
c. Overall Height - mast lowered	6.91 ft
d. Wheelbase	5.25 ft
e. Ground clearance	4.34 in
g. Max Fork Height	9.85 ft in
Operating Weight	8113.1 lb
Fuel Type	Gasoline
